

# Veeva SiteVault

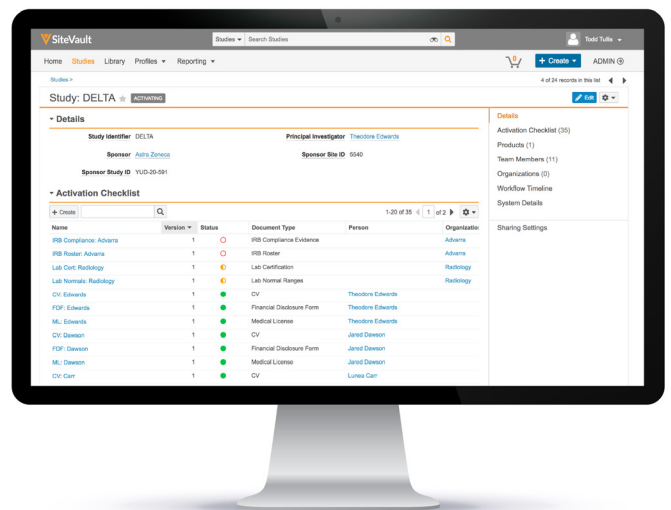

Save Time,  
Accelerate Your Research

Streamline documents and clinical trial processes  
in an intuitive eRegulatory system

## Overview

Veeva SiteVault reduces the administrative burden in clinical trials by simplifying the management of regulatory documents and processes across all studies to speed study execution.

SiteVault can be used for all trials regardless of what technology sponsors are using, as well as the site file for investigator initiated trials.

## Benefits

- Reduce administrative burden:** Increase efficiency by standardizing regulatory documents and processes
- Speed study activation:** Streamline reviews and approvals to speed study activation and enroll patients sooner
- Increase visibility:** Gain real-time visibility into document status to improve compliance and oversight

## Top Companies Use Veeva

Veeva is the leading provider of clinical operations technology to more than 200 sponsors and leading research organizations.

## Choose the Veeva SiteVault product that is right for you
